

# VS/AM 58

The **VS/AM 58** by Pietro Fiorentini is a relief valve which vents gas when the system pressure exceeds the set value due to temporary events. During no-flow conditions, thermal expansion of the gas can cause downstream static pressure to build up. The relief valve **will prevent downstream pressure from rising** due to gas temperature change, downstream pressure shocks caused by sudden changes of flow or eventually regulator's lock-up failure. Particularly suitable in high-pressure transmission systems and in medium pressure gas distribution networks. It should to be used with previously filtered non-corrosive gases. The VS/AM 58 is **Hydrogen Ready** for NG-H2 blending.

Gas compression /  
booster stations

LNG marine  
transportation

Heavy industry

Gas liquefaction

Gas reverse-flow

Regasification

Gas storage

Power generation

District stations

City gates

Features	Values
Design pressure*	up to 10 MPa up to 100 barg
Ambient temperature*	from -20 °C to +60 °C from -4 °F to +140 °F
Gas temperature*	from -20 °C to +60 °C from -4 °F to +140 °F
Available accessories	Limit switch BLD 211
Rangeability	up to 1:100
Accuracy	up to 2%
Nominal size	DN 25 / 1"
Connections	<ul style="list-style-type: none"> <li>• Threaded EN 10226-1</li> <li>• NPT according to ASME B1.20.1</li> <li>• ANSI 300 and 600 according to ASME B16.5</li> </ul>

(\*) NOTE: Different functional features and/or extended temperature ranges may be available on request. Stated inlet gas temperature range is the maximum for which the equipment's full performance, including accuracy is guaranteed. Product may have a different pressure or temperature ranges according to the version and/or installed accessories.

**Table 1** Features

## Materials and Approvals

Part	Material
Body	Aluminium
Plug	Stainless steel + nitrile rubber or viton (as optional)
Valve seat	Stainless steel

**NOTE:** The materials indicated above refer to the standard models. Different materials can be provided according to specific needs.

**Table 2** Materials

The **VS/AM 58** spring relief valve is designed according to the European standard EN4126-1. The product is certified according to European Directive 2014/68/EU (PED). Leakage class: bubble tight, better than class VI according to ANSI/FCI 70-2 and equivalent to class VIII according to ANSI/FCI 70-3.

EN4126-1

PED-CE

## VS/AM 58 competitive advantages

Compact dimensions

Fast response

Easy maintenance

Limit switch option (BLD 211)

Adjustment nut sealing

Biomethane compatible and  
20% Hydrogen blending compatible.  
Higher blending available on request
